

Fake Snow

Where does snow come from? Why do only parts of the world have snow and others don't? Research snow from home while you make your own with items you can find in the kitchen!

➤ Materials:

- 2 cups frozen baking soda
- Shaving cream
- 1/3 cup of cold water
- Large mixing bowl

Optional materials:

- Glitter
- Peppermint extract or oil for a wintery scent
- Snowman parts!

➤ Directions:

- Pour 2 cups of frozen baking soda into a large mixing bowl. (Freezing the baking soda isn't necessary but it makes the "snow" extra icy!)
- Add some shaving cream to the baking soda and mix.
- Slowly add a small amount of water to your mix until you've reached the desired consistency, cold and fluffy!
- Do you wanna build a snowman? Get creative with your snow and build a snowman or other fun things! Add some glitter or peppermint scent for a little something extra!
